The IRS Modernized e-File (MeF) Production system is in scheduled shutdown in preparation for the upcoming 2023 Filing Season (2024 Processing Season). Filings made after December 26th, 2023 will be held for submission until the MeF system begins processing and accepting electronic business returns for the new tax year. The IRS has yet to announce the official date the 2024 business tax season will start, we are estimating January 16th, 2024. Filings completed prior to then will

be processed when IRS e-file begins accepting business returns for the new tax season.

In the meantime, you can disregard any other Form 990 series filing reminders you may receive until the e-file system comes back online -- you currently have the above Form 990 series notices or returns pending submission.
