Hello all,

Hope you had a great weekend. I present for your viewing pleasure and serious consideration the following weekend tasks for your ongoing prepping fun. Yeah okay, maybe not loads of fun but absolutely necessary to consider.

It's weekend's tasks:

1. Check your food storage for pests — insects, rodents, family pets. **Diatomaceous earth** has helped keep my food storage area free from almost all insects.
2. Declutter a spare closet or cupboard to **make space** to store preps.

There you have it folks, quick tasks that may save you loads of time and headaches later.
Have a great weekend.

Prep on,

Barb 🌻
