Notes about projection

All numbers assume the same cost in FY 2023/2024 as in FY 2022/2023 except that the cost for water was annualized. These costs could show increases, but we won't know how much until the bills are received. Electricity could be higher or lower, depending on how much we use the Center for activities or rent the rooms and turn on the heat or air. This assumes that we have no additional rentals beyond the current month. So room rentals would improve the projection (less any additional cost for heating, air and supplies). The projection does not include future expenditures for activities, like food, toilet paper, etc.)
