More

There is renewed interest at Alapine about discussions concerning end of life decisions and faci death.

Alapine residents conducted these kinds of discussions and planning sessions several times in t past 27 years, and we want to share some of the things we found helpful.

One is a booklet called The Critical Conditions Planning Guide and several of us still carry a Criti Conditions wallet card.

It was published in 2006 and we got it through Redmond Hospital.

The website from the publishers is no longer active.

But Winnie bought, downloaded, and emailed a pdf of the booklet to residents in 2016.

We have attached it here.

Here is a link to another planning guide and the website is current for 2024.
